CONNESSIONE DEL SISTEMA IDRAULICO

ATTIVAZIONE DELLA PROTESI E SUTURA DEI PIANI CUTANEI

MEDICAZIONE COMPRESSIVA

Rimozione del catetere e del drenaggio in 1^a giornata postoperatoria

Dimissione in in 2^a giornata postoperatoria

Chinolonic per os fino alla 10^a giornata postoperatoria

CONTROLLO IN TERZA GIORNATA POSTOPERATORIA

La protesi viene lasciata attivata al 70-80 % per almeno 2-3 settimane.

Successivamente consigliamo di lasciarla attivata durante la notte per ancora 4 settimane.

La attività sessuale può iniziare già dopo 4 settimane (quando scompare il dolore).

Training per l'uso della protesi e counselling attivo fino a tre mesi dopo l'impianto.

GRAZIE PER L'ATTENZIONE
